# EQUITONE [lunara]

EQUITONE [lunara] is a through-coloured fibre cement panel with a surface resembling a lunar landscape that demonstrates the natural quality of fibre cement as a material. The special production process makes each panel unique in terms of its colour, texture and surface, with a pattern that is not repeated. The rough, unpolished surface looks as if it was created naturally and invites you to touch it. The material comes in a large panel size and can be transformed into any size or shape in the workshop or on site. No matter what design options you explore, EQUITONE's through-coloured nature guarantees crisp, monolithic details.
